

DX AUTOTANK

- For cleaning Direct Expansion tanks
- Caustic/chlorine based cleaner
- For use in hard or soft water areas
- Contains unique blend of sequestrants and soil suspending agents
- Effectively cleans and sanitises all internal surfaces of the direct expansion tank

Application

Automatic Cleaning of Direct Expansion Tanks:

Follow the equipment manufacturer's instructions.

Automatic Cleaning of Bulk Tanks by Re-circulation:

1. Immediately after the tank is emptied, rinse thoroughly with clean, cold water to remove milk residues
2. Make up a solution of product at a rate of 125ml in 40 litres (5 fl oz. in 10 gallons) of water at 70°C & circulate solution for 15 - 20 minutes and then run to waste.
3. Rinse with clean water and allow to drain. Red Label Hypochlorite may be added to this rinse water at the rate of 25 ml in 40 litres (1fl. oz. in 10 gallons) where the water supply requires treatment.

Automatic Cleaning of Milking Machines:

1. Immediately after milking clean off the outside surfaces of the equipment, paying particular attention to the teat dip clusters.
2. Flush system through with cold water to remove residual milk traces, running water to waste.
3. Run the required quantity of hot water 77°C - 82°C (170°F - 180°F) into the wash trough and add product at a rate of 125mls in 40 litres (5fl.oz. in 10 gallons) of water into the plant allowing the first few gallons to run to waste until the solution is discharging hot 65°C from the return line. Then set the return line for circulation and continue circulating for a further 10 minutes.
4. After cleaning, flush the system through with clean cold water. Red Label Hypochlorite may be added to the final rinse water at a rate of 25mls in 40 litres (1 fl. oz. in 10 gallons).

Composition

Available Chlorine: 3% w/v on manufacture

Active alkalinity: 9.3 as % w/w Na₂O

Storage

Store in a well ventilated area away from acids and ammonia

Shelf life

12 months from date of manufacture

Pack Size

25 litre
